

■ PET SAFETY & VACCINATION

A Community Guide for Pet Owners

Keeping your pet healthy protects not just your animal — it protects your family, your neighbors, and your community. This guide covers everything you need to know: core vaccines, safety hazards, emergency contacts, and how to read a vaccination record.

VACCINATE	PREVENT	PROTECT
Core shots protect against deadly, contagious diseases.	Avoid toxic foods, plants, and common household hazards.	Know emergency numbers and keep records up to date.

Inside this brochure: Dog & Cat Vaccination Schedules • Core vs. Non-Core Vaccines • Common Hazards & Toxic Foods • Emergency Contacts • Printable Vaccine Record

Vaccination Schedules

■ Dog / Puppy Schedule

Age	Vaccine(s)	Type	Notes
6–8 weeks	DHPP (combo)	Core	First dose in series
10–12 weeks	DHPP booster	Core	2nd dose
14–16 weeks	DHPP + Rabies	Core	Rabies legally required in most states
12–16 weeks	Bordetella	Non-core	Recommended for social/boarded dogs
12–16 weeks	Leptospirosis	Non-core	Recommended in FL flood-prone areas
1 year	DHPP booster + Rabies	Core	Then every 1–3 yrs per vet advice
Annual	Bordetella, Lepto, Lyme	Non-core	Based on lifestyle & risk

■ Cat / Kitten Schedule

Age	Vaccine(s)	Type	Notes
6–8 weeks	FVRCP (combo)	Core	Panleukopenia, calicivirus, herpesvirus
10–12 weeks	FVRCP booster	Core	2nd dose
14–16 weeks	FVRCP + Rabies	Core	Rabies required where mandated
< 1 year	FeLV	Non-core	Core for kittens & outdoor cats
1 year	FVRCP + Rabies	Core	Then every 1–3 yrs per vet advice
Annual	FeLV	Non-core	Outdoor or multi-cat households

After vaccination: Mild soreness, low energy, or a slight fever for 24–48 hours is normal. Contact your vet immediately if you notice facial swelling, vomiting, difficulty breathing, or collapse — these are rare but require urgent care.

Common Pet Hazards

Many everyday items in and around your home can seriously harm or kill your pet. The list below covers the most common dangers — keep them out of reach at all times.

■ Foods to Avoid

- Chocolate & caffeine
- Grapes, raisins & currants
- Onions, garlic & chives
- Xylitol (sugarless gum, some peanut butters)
- Macadamia nuts
- Alcohol & raw yeast dough
- Avocado (especially toxic for birds)
- Cooked bones (splintering hazard)

■ Toxic Plants

- Sago palm (highly toxic — liver failure)
- Lilies (fatal to cats — all parts)
- Azalea / rhododendron
- Oleander
- Tulip & daffodil bulbs
- Aloe vera
- Dieffenbachia (dumb cane)

■ Household Chemicals

- Antifreeze / ethylene glycol
- Rodenticides (rat poison)
- Insecticides & flea products (wrong species)
- Cleaning products & bleach
- Essential oils (diffusers harmful to cats)
- Fertilizers & pesticides

■ Environmental Dangers

- Hot cars — deadly within minutes
- Pools & open water (drowning risk)
- Electric cords & outlets
- Small objects (swallowing / choking)
- Open windows without screens
- Extreme heat & cold exposure
- Unvaccinated or unknown animals

Emergency Contacts & Resources

Resource	Contact / Link	Available

WSAVA Vaccination Guidelines	wsava.org/guidelines/vaccination	Online (Free PDF)

Quick Safety Tips

- ✓ Keep your vet's number saved in your phone.
- ✓ Store all medications out of pet reach.
- ✓ Know where the nearest 24-hr emergency vet is.
- ✓ Check the ASPCA toxic plant database before buying new plants.
- ✓ Never give human medications without vet approval.
- ✓ Use a pet ID tag AND microchip — both.
- ✓ Keep a pet first-aid kit at home.
- ✓ Take photos of your pet regularly for ID purposes.

■ If your pet ingests something toxic:

1. Stay calm — panicking delays help. 2. Identify the substance if possible (save the label or packaging). 3. Do NOT induce vomiting unless instructed by a vet or poison control. 4. Call ASPCA Poison Control: (888) 426-4435 or your emergency vet immediately.

My Pet's Vaccination Record

Fill in this record at each vet visit and keep it safe. Bring it whenever you travel, board your pet, or visit a new veterinarian.

Pet Name:	_____	Species / Breed:	_____
Date of Birth:	_____	Color / Markings:	_____
Microchip #:	_____	Owner Name:	_____
Owner Phone:	_____	Vet Clinic:	_____
Vet Phone:	_____	Emergency Contact:	_____
